/ About me

I am a communicative and creative individual and, throughout my training, I have come to understand the importance of each stage a web product goes through to reach users.

As a Frontend Developer, I can collaborate effectively with both the UX/UI and Backend teams, and my goal is to ensure the most efficient process, with the ultimate focus on satisfying the end user needs.

In the future, I aspire to create open-source JavaScript libraries or contribute to existing ones, in order to enhance a programmer's workflow.

/ Language skills

- Romanian — Native
- Italian — C2
- English — C1
- German — B1

/ Projects

Barbershop - Fullstack NextJs Website

The project that I'm currently working on, built with the following tech stack:

- NextJs, Typescript, Sanity
- Tailwind, MaterialUI, FramerMotion

Link: barber-shop-psi.vercel.app

Paperless - Fullstack ReactJs + ExpressJs Web App

A complete project in which I implemented a backend Authentication system, using the following stack:

- ReactJs, ReactQuery, Typescript, Vite
- ExpressJs, MongoDB, Mongoose, Axios
- Tailwind, MaterialUI, FramerMotion

Link: paperless-mariushor.netlify.app

Dictionary - Vanilla Javascript Web App

One of the "vanilla" JavaScript projects that I've worked on, using the following:

- HTML, CSS, SASS, Bootstrap
- Javascript, Webpack

/ Professional experience

2022-present — **Open-Source and Self-Learning Web Developer**

Starting from May 2022, I dedicated myself to learning everything involved in creating a web product:
- From the research phase, wireframing, and prototyping in **Figma**
- To the coding part, where I used and learned the following:
  - **HTML, CSS, SASS**
  - **Javascript, Typescript, React/NextJs, Redux, ReactQuery, Vue, VueX**
  - **NodeJs, ExpressJs, MongoDb, Mongoose, Sanity, Vite, Webpack**
- To the testing side:
  - **Jest and Vitest**
- And I also delved into the following tools and methodologies:
  - **GIT** and **Github** for version control
  - **Agile** methodology, **Scrum**, **JIRA**, **Asana**
  - **Design Patterns**, **SOLID** principles, **clean code**

I've also worked on open-source projects, where I learned the essence of teamwork in an IT environment.

2022-present — **HR Associate - Peer checker**
Conduent - Iași, Romania

Within this project I improved the following skills:
- **German language** proficiency
- Meeting **deadlines** and **analytical thinking**
- Providing constructive **feedback** to colleagues

2020-2022 — **Factory / Warehouse worker**
Germany and Switzerland

As a result of this experience I improved the following skills:
- **German language** proficiency, **stress resilience** and the ability to make **quick decisions.**

2014-2017 — **Call-center Sales Agent**
Open Mind Group - Iași, Romania

Within this project I improved the following skills:
- **Empathy**, **confidence** and **strategic communication**
- Meeting **deadlines** and **analytical thinking.**

/ Education

2017-2020 — **"Alexandru Ioan Cuza" University of Iași**

"Italian - English Language and Literature" Bachelor's degree

/ Courses and certifications

- Udemy - **The Complete JavaScript Course 2023: From Zero to Expert!**
- Udemy - **JavaScript: The Advanced Concepts (2023 Update)**
